Backend Developer | Node.js | PostgreSQL | Google Cloud

SUMMARY

Backend developer with experience building and deploying a healthcare scheduling system using Node.js and PostgreSQL. Built APIs for appointment booking, conflict-free scheduling across appointments, schedules, and leaves, and role-based access for doctors, patients and receptionists. Deployed on Google Cloud and handled real-world workflows including triage and consultation.

EXPERIENCE

Dezoko

Backend Developer Intern

Bangalore, India

Jan 2026 – Apr 2026

- Built a healthcare scheduling system used by doctors and receptionists to manage patient appointments
- Designed scheduling logic that combines doctor availability, existing appointments, and leaves to prevent overlaps and ensure correct slot allocation
- Built triage flow to handle emergency and priority patients and assign them to available doctors
- Implemented role-based access for doctor and receptionist workflows including scheduling, booking, and consultations
- Developed consultation flow where doctors record notes and upload medical files such as reports and scans
- Implemented phone number login with OTP authentication using Firebase
- Built patient search and history features to speed up booking during busy hours
- Deployed backend using Node.js and PostgreSQL (Prisma) on Google Cloud Run and handled secure file uploads using signed URLs

Tech Stack: Node.js, Express, PostgreSQL, Prisma, Google Cloud Run, Firebase

KPN Farm Fresh

Backend Developer Intern

Bangalore, India

July 2025 – Sep 2025

- Worked on migrating cart APIs from an existing system to a new e-commerce backend, integrating inventory, catalog, and order workflows
- Modified API contracts and response structures to align with new system requirements and ensure consistent data flow across services
- Managed PostgreSQL schema using migrations to support updated data models
- Developed backend modules using TypeScript and Nest.js
- Set up Docker-based environment for local development and testing

Tech Stack: Node.js, Fastify, Javascript, PostgreSQL, Docker, REST APIs

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Backend: Node.js, Express, Fastify, NestJS

Databases: PostgreSQL, Prisma, Knex

Cloud & DevOps: Google Cloud (Cloud Run, Cloud SQL, Storage), Docker

Auth & APIs: JWT, RBAC, Firebase OTP, REST APIs

Tools: Git, Postman, Swagger

Frontend (Basic): React (projects), HTML, CSS

EDUCATION

The National Institute of Engineering, Mysore, Karnataka

Bachelor of Engineering in Information Science and Engineering

CGPA: 7.64 / 10.00

May 2025
